REGISTER OF RAINFALL IN 1910

FORM A2.2
BRITISH RAINFALL
26 JAN 1911

Kept at Southwark Park

in the County of S of Thames

by J. Carlson L.C.C.

Pattern
RAIN GAUGE Diameter of top _____ in.
Height of top above Ground _____ ft.
" " " Sea Level _____ ft.

Time of Observation _____

Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

Kept at Brockwell Park

in the County of S. of Thames

by Lt. Col. J. J. Lecky & White

Pattern _____
RAIN GAUGE Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level _____ ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

by F. C. Bayard H. C. C. C.

RAIN GAUGE Pattern
Diameter of top 8 in.
Height of top above Ground 2 ft. 2 in.
" " " Sea Level 14 ft.

Time of Observation _____

Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL

London County Council.

ENGINEER'S DEPARTMENT,

County Hall, Spring Gardens, S.W.

Telegraphic Address.
Engineer % Witan London.
Telephone No. 4201.
Gerrard.

22nd April 1909.

Dear Sir,

With reference to your letter of the 19th. instant, the rainfall at the Crossness and Deptford pumping stations is read every morning at 9.a.m., but to make sure that the returns are entered as you desire I am writing the Superintendents at these stations on the point. With regard to the County Hall, the office does not open until 9.30 a.m. but I am endeavouring to arrange for the readings to be taken at 9 a.m.. With regard to the last paragraph in your letter, I find that the rainfall at the County Hall read at 9.30 a.m. on the 1st. January last measured 0.40" for the previous 24 hours - that at Deptford 0.14" - that at Crossness 0.04" for the same period, from 9 a.m. on December 31st. 1908.

I am, Dear Sir,

Yours faithfully,

Handwritten signature
Chief Engineer.

H. R. Mill Esq.D.Sc.,
62, Camden Square,
London, N.W.

Rainfall Records, 1909.
Western Pumping Station, Chelsea.

Dear Sir.

On receipt of your letter of the 31st ultimo I communicated with the Superintendent of the above-named station. The latter has referred to the records for the Let's Road and Kings Scholars Pond establishments, and agrees with your suggestion that an error of 1 measure (.50") was made in the entry at the Western Pumping Station for the 28th October last. I shall be glad therefore if you will alter the figures referred to from '48' to '98'.

I am, Dear Sir,
Yours faithfully,

Maurice Fitzmaurice
per W.S.W.

Ask for these

Dr H. R. Mill,
62, Camden Square,
N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
19 JAN 1911

Kept at Chelsea Pumping Station
in the County of London
by London County Council

Pattern
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 19 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Grosvenor Rd
Distance 1/2 Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
14 JAN 1910

Kept at *The Park Keepers Cottage.*
Bavington Road, Brough End
in the County of *Middlesex*
by *The Corporation of Haringey*
Mr E. J. Lovegrove
Borough Engineer & Surveyor

Pattern
RAIN GAUGE Diameter of top in.
Height of top above Ground ft.
" " " Sea Level ft.
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1941

Kept at Deptford.
in the County of LONDON.
by _____

Lat. _____ Long. _____
Time of Observation _____
Nearest Railway Station _____
Diameter of Funnel of Rain Gauge _____ in.
Height of top of Gauge above Ground _____ ft. _____ in.
" " " " Sea Level _____ ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day.
An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

BRITISH RAINFALL
7 JAN 1911

Kept at *Jenny more*
in the County of *Middx*
by *Thos. Sm*

CASTLE BAR HILL
MIDDX
1910

p. 5 in.
above Ground 1 ft. 0 in.
Sea Level 152 ft.
7.0 am
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2
BRITISH RAINFALL
3 JAN 1910

Kept at Carisbrooke, Culloden Road, Enfield
in the County of Middlesex
by John McEwan

Pattern Snowdon
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground — ft. 12 in.
" " " Sea Level 204 ft.
Time of Observation 8 am
Nearest Railway Station { Name Enfield G.N.R.
Distance 2 mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Carisbrooke, Enfield
in the County of Middlesex
by John McEwan

RAIN GAUGE Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 12 ft.
" " " Sea Level 204 ft.
Time of Observation 8 am
Nearest Railway Station { Name Enfield G.N.R.
Distance 2 mi Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
- 5 JAN 1911

Kept at Finchley
in the County of Middlesex 2
by Chas J Jenkin, Engineer & Surveyor

RAIN GAUGE
Pattern
Diameter of top _____ in.
Height of top above Ground _____ ft.
" " " Sea Level 300 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Church End, Finchley
Distance 2.2 m Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1; following.

REGISTER OF RAINFALL IN 1910

Kept at *M. W. B. Forrest Hill*

in the County of *Kent*

by *J. F. Woyce Esq.*

Pattern
RAIN GAUGE Diameter of top *5* in.
Height of top above Ground ft. in.
" " " Sea Level *340* ft.
Time of Observation *9 a.m.*
Nearest Railway Station { Name *Honor Oak*
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

27th Feb. 1915
REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.

Kept at Squires Mount, Hampstead.
in the County of Middlesex.
by The Misses Field

RAIN GAUGE { Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 388 ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
26 JAN 1911

Kept at Hampstead Akenside Road
in the County of London R. of Thames
by E. L. Hawke Esq

Pattern
RAIN GAUGE Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level _____ ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Nearest Railway Station Name Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Sold. that as his enquiry failed to show any evidence of error we would accept the figures as correct. H.F.R.

H. F. Rutter, M. Inst. C.E.
 ENGINEER.

West Middlesex Water Works,
Engineer's Office,
Hammersmith, W.

June 11/03

H. Lowerby Wallis Esq.

Dear Sir

A careful examination of Platts Lane return has not resulted in the discovery of any obvious error.

We always expect a heavier return there than at our other stations. For instance, taking the dates mentioned in your letter, we get:—

	<u>Barrow Hill</u>	<u>Willesden</u>	<u>Platts Lane</u>	<u>C.S.</u>
<u>March 14</u>	<u>.53</u>	<u>.55</u>	<u>.76</u>	<u>.66</u>
<u>June 3</u>	<u>.20</u>	<u>.22</u>	<u>.50</u>	<u>.27</u>
<u>Nov. 24</u>	<u>.26</u>	<u>.29</u>	<u>.60</u>	<u>.25</u>
<u>Dec. 1</u>	<u>.09</u>	<u>.13</u>	<u>.30</u>	<u>.09</u>
<u>" 17</u>	<u>.48</u>	<u>.48</u>	<u>.60</u>	<u>.50</u>

The observer seems to understand reading the scale.

Yours faithfully

H. F. Rutter

Kept at Hampstead(Kidderpore Res.)

in the County of LONDON.

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

WEALDSTONE HOUSE,
R.S.O.
MIDDLESEX.

13.1.1909

Dear Sir

I am afraid that during the past year some mistake has been made in measuring our rainfall owing to the old measure having been broken & the new one being apparently different from the old. Before I make a return I shall be

Mo. 26.1.09

C

As the house is now empty, I am sorry to hear that the house is now empty.

glad if you will let
me know how many ounces
(liquid measure) there
are in half an inch of
rain from a five inch
gauge. With this information
I hope to be able to test
our measure & will then see
whether I can make a
reliable return.

Thanking you in anticipation
Yours very truly
D. H. R. Hill Russell R. Cobb

P.S. Would you mind sending
me a ~~extra~~ large sheet?
(from A.) R.R.C.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1906

FORM A.
BRITISH RAINFALL.

6 FEB 1907

Kept at *The Sanitary Depot, High St. Hornsey*
in the County of *Middlesex*
by *Mrs E. J. Lovegrove*
Corporation of Hornsey

Lat. _____ Long. _____
Nearest Railway Station _____
Time of Observation _____
Diameter of Rain Gauge _____ in.
Height of top of Gauge above Ground _____ ft. _____ in.
" " " Sea Level _____ ft.

NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. Full instructions for the measurement of rain and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

19 JAN 1911
FORM A2.
BRITISH RAINFALL.

Kept at Isle of Dogs Pumping Station
in the County of London
by London County Council

Pattern
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 14 ft. 6 in.
Time of Observation 9 a.m.
Nearest Railway Station { Name Poplar
Distance 5/8 miles Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.
